

## ACE

The Ace is a classic reborn! With more symmetrical, yet slightly downturned last shape and low volume toe, Ace is a versatile shoe with a less aggressive shape. Featuring a stiffer midsole and rubber protection over the toe, Ace has been optimised for traditional climbing and cracks.

Ace features a premium quality split leather upper and a secure lace closure. The low volume last shape has been kept more symmetrical to help fit those with long second toes, yet maintains a precise toe shape for pockets.

A rubber patch covers the toe area to protect the foot while jamming in cracks and to aid friction while toe hooking. A stiff midsole support the foot on small edges and on long routes. Sticky Zenith Pro™ rubber provides excellent friction and a firm hold even on tiny edges.

Whether your aspirations are short grit outcrops, sandstone splitter cracks or huge granite walls, Aces are a winning pair.

- **UPPERS** Split leather with lace closure for optimum fit. Extra rubber toe patch for crack climbing
- **LINING** No
- **MIDSOLE** Special anti deformation midsole
- **CONSTRUCTION** Slip-Lasted
- **SOLE** BOREAL® Zenith Pro™ outsole. 4-4.5mm thickness depending on size
- **CHARACTERISTICS** Comfortable and supportive. Ideal for long days at the crag and pushing your grade; whether torquing into cracks, edging or making delicate friction moves
- **USAGE** Multi-pitch and traditional climbing in every kind of rock
- **SIZES** 4-12 U.K. in half sizes
