

BETA

Beta reflects the changing requirements of newer climbers who predominantly climb on indoor walls. Offering superb breathability and comfort alongside higher performance features usually found on more technical models. Beta is ideal as a first pair or as a comfortable and inexpensive training pair for more advanced climbers.

Beta features a comfortable symmetric and mildly downturned last shape with a medium tension low volume heel. This helps introduce a more technical fit, and allows more advanced techniques using the heel to be used. The upper is constructed from a highly breathable knitted synthetic textile, providing low stretch and great next-to-skin feel. A medium stiffness midsole paired with the sticky and durable Zenith Quattro™ rubber provides the ideal blend of edging support and long-lasting friction.

Beta is a highly versatile shoe which could be sized for comfort on multi-pitch or all day climbing, or sized tightly for higher performance and training.

- **UPPERS** Synthetic knitted textile material for optimal breathability. Quick and easy double strap closure system
- **LINING** No
- **MIDSOLE** Special anti deformation midsole
- **CONSTRUCTION** Slip-Lasted
- **SOLE** BOREAL® Zenith Quattro™ outsole. 4-4.5mm thickness depending on size
- **CHARACTERISTICS** Light and breathable model suitable for long climbing sessions. Ideal for newer climbers, or worn tight can be an excellent option for more advanced climbers on vertical or slabby terrain, or when training
- **USAGE** For beginners, training and multipitch climbing
- **SIZES** Male: 5-12 U.K. in half sizes, Female: 2-8,5 U.K. in half sizes
