

## SENDAI

All day, every day and nearly everywhere too! Sendai is a tough and multi-purpose approach shoe which is comfortable and stylish enough to use every day. BOREAL Sendai will take you from the office to the mountains and everything in between.

The upper is made from premium quality split leather with a padded and well ventilated PU Air Net lining for breathability and comfort. A PU overlay rand protects the upper from knocks and scrapes.

Sendai features the exceptional Terra outsole, a collaborative development between BOREAL and Michelin. This outsole using the high grip Michelin OCX® rubber compound and rugged tread design provides superb traction in all weathers and has an integrated toe-cap for durability and protection. An extensive climbing zone at the toe provides edging performance on technical terrain, while the TPU piece under the toes and heel provides support and stability.
